Quiz Assignment 01

Duration: 13:05 – 14:35

Flight BOOKING:

Try to create below form following the sub-tasks:

- **destination** (select options, choose minimum 3 options, for each option there are values)
- **adults** (x1), (input type: text; -> write name of all passengers) + (input type: number -> number of adult passengers)
- **children** under six (x0.5), (input type: text; -> write name of all children's) + (input type: number -> number of child passengers)
- **round trip** (x1.5) OR **one way** (x1) (two radio buttons)
- **standard class** (x1) OR **business class** (x2) (two radio buttons)
- **Extra luggage's**
 - Not Have
 - **Have** (If have extra luggage, display count of luggage's like a selection or input box, price for each luggage is 30 azn)
- Book **button** to submit (create form and event handler)
- After submission calculate the total cost (**create function**) and display the order results (**create function**) after 1 second, below the form in separate div container.

Note: x1, means coefficient is 1, we must multiply the cost to coefficient (1)
